About the Course

EDIUS Video Editing Software is a fast and highly versatile multi-format editing program designed for use by both filmmakers and broadcast professionals. Capable of handling nearly any format from any camera--at resolutions up to 4K--EDIUS provides the real-time editing, solid user interface, and wide native support that advanced professional productions crave. With its ease of use, precision control, and solid, optimized workflow, EDIUS is the right post-production tool for any film or video project, no matter how large or complex.

Prerequisites

This course assumes a basic knowledge of video technology and computer use. You should be familiar with concepts such as time-code, video formats and file types. You should feel confident working with a mouse and keyboard using Microsoft Windows operating system to complete standard operations such as coping, pasting, renaming and deleting.

Who Should Attend

This course is for any editor with a background in linear tape or film editing or anyone wishing to transfer skills from another non-linear editing system to EDIUS. As this is an introductory course, anyone with a basic understanding of computer operation and video technology will also find it an excellent introduction to post-production and editing techniques.
