Course Overview

In this Bootstrap training class, you will discover how to design killer interfaces and responsive websites with the Bootstrap framework. You will get started building pages with Bootstrap's HTML/CSS-based tools and design templates. You will also learn how to extend apps with interactive features, using its suite of jQuery plugins, often without writing a single line of code.

Objective

- Become familiar with Bootstrap's file structure, grid systems, and container layouts.
- Learn Html elements for typography, code, tables, forms, buttons, images, and icons.
- Design interfaces and other web elements, such as navigation, breadcrumbs, and custom modal windows.
- Use jQuery plugins for features such as revolving slideshows, tab-able interfaces, and drop-down menus.
- Modify everything from column count to typography colors with the Less stylesheet language.
