PROFESSIONAL TRAINING COURSE

3 Days Course on

Adobe Dreamweaver : Mastering the Essentials

Course Overview

In this course, students will use the advanced features of Dreamweaver to design and develop professional-looking websites.

Who Should Attend

This course is designed for students who not only use Adobe Dreamweaver to design and develop webpages in a WYSIWYG environment, but also have the ability to understand and work with the architecture and coding of web pages. Students are those in small companies or departments within large companies who use web technologies for electronic communication.

	What is HTML?		
	Where did HTML begin?		
	Writing your own HTML code		
	 Frequently used HTML 4 codes 		
	Where Is HTML Going?		
	CSS Basics		
	What is CSS?		
	 HTML vs. CSS formatting 		
	CSS box model		
	HTML defaults		
	Formatting text		

Two Sigma Technologies

	Formatting abjects
	 Formatting objects Multiples, classes, and IDs, oh my!
12.45pm – 02.15pm	Lunch
02.15pm – 05.00pm	Getting a Quick Start
	Defining a Dreamweaver site
	Using the Welcome screen
	Selecting a CSS layout
	Saving a page
	Modifying the page title
	Changing headings
	Inserting text
	Inserting images
	 Selecting and modifying CSS styles
	 Adjusting text fonts, colors, and sizes
	Using the Property inspector
	Previewing a page in Live view
	Previewing pages in a browser
	Day 2
09.00am – 10.00am	Creating a Page Layout
	Web design basics
	 Working with thumbnails and wireframes
	Previewing your completed file
	 Modifying an existing CSS layout
	 Adding a background image to the header
	 Inserting new <div> components</div>
	 Modifying the page width and background color
	 Modifying existing content and formatting
	Inserting an image placeholder
	Inserting placeholder text
	Modifying the footer
	Checking browser compatibility
10.00am – 10.30am	Breakfast
10.30am – 12.45pm	Working with Cascading Style Sheets
	Previewing a completed file
	Working with the CSS Styles panel
	Creating new CSS rules
	Creating an interactive menuModifying hyperlink behavior
	 Creating faux columns
	Moving rules to an external style sheet

	Creating style shorts for other media types
	Creating style sheets for other media types
	Working with Templates
	 Previewing completed files
	 Creating a template from an existing layout
	 Inserting editable regions
	 Producing child pages
	Updating a template
	Using Library items
	Using server-side includes
12.45pm – 02.15pm	Lunch
02.15pm – 05.00pm	Working with Text, Lists, and Tables
	Previewing a completed file
	Importing text
	Creating headings
	Creating lists
	Creating text indents
	 Creating and styling tables
	Spell checking web pages
	Finding and replacing text
	Working with Images
	Reviewing web image basics
	Previewing the completed file
	 Inserting an image
	Working with the Insert panel
	Using Adobe Bridge
	Inserting incompatible file types
	 Working with Photoshop Smart Objects
	 Copying and pasting images from Fireworks and Photoshop
	 Inserting images by drag and drop
	 Optimizing images with the Property inspector
	Day 3
09.00am – 10.00am	Working with Navigation
	Hyperlink basics
	Previewing your completed file
	Creating internal hyperlinks
	 Creating an image-based link
	 Creating an external link
	 Setting up e-mail links
	Targeting page elements
	Inserting Spry menu bars
	Inserting Spry menus as Library items
	Checking your page
10.00am – 10.30am	Breakfast
10.30am – 12.45pm	Adding Interactivity
