## Course Overview

Developing with Git introduces the distributed development version control system that originated with the Linux kernel development community and is now being used on an ever increasing number of projects. Students will rapidly come up to speed on Git's concepts, basic commands, and how it is used in everyday work. Learn the fundamental concepts behind the Git version control system. Practice how to create, manipulate and share Git repositories with hands-on lab exercises.

## Prerequisites

- Basic knowledge of Linux interfaces (including Linux/UNIX command line interfaces).
- Be comfortable using any of the available text editors.
- Experience with any major linux distribution is helpful but not strictly required.

## Course Settings

Date	Refer to Training Calendar
Venue	Refer to Training Calendar
Fees	Contact Us at sales@2-sigma.com
Timings	0900-1700 (2 Days)
Inclusive	Certificates and notes
Audience	Software Developers, System Engineers, System Analysts and Web Developers.
