**PROFESSIONAL TRAINING COURSE** 

# 2 Days Course on Linux Web Server Hardening & Maintenance

Two Sigma Technologies Suite B, 19-2, Jalan PGN 1A/1, Pinggiran Batu Caves, 68100 Batu Caves, Selangor Tel : 03-61880601/ 012-3748301 Fax :03-61880602 farah@2-sigma.com www.2-sigma.com

#### **Course Overview**

The Linux Web Server Administration course is aimed at technical staff who will be responsible for installing, configuring and maintaining Web Servers in a Linux or UNIX environment. The course addresses the evolution of Apache Web Server technology, as well as how to build, install, and configure Apache. Web-related issues such as authentication, dynamic Web content and virtual hosting/administration are included.

The course will be run on a Linux platform, but it is suitable for all UNIX based deployments. Although being run in a Linux environment, delegates who will be supporting Apache Web services in a Windows environment will also benefit from this course as most configuration is carried out through editing of configuration files.

### **Prerequisites**

Delegates will need to have experience of using a UNIX or Linux system at the command line. They will need to be familiar with the UNIX/Linux file system and basic file manipulation commands and will benefit from a basic knowledge of the VI editor.

#### What you will learn

By the completion of the Web Server Administration course you should be able to:

- Design and build a web server using Apache
- Configure and deploy virtual hosting with Apache
- · Maintain security with Apache
- Hardening PHP & MySQL database
- Setting up Apache with SSL (HTTPS)
- Best practices in monitoring and maintaining web server

## **PHP Security -Schedule**

| Day 1             |   |  |
|-------------------|---|--|
| 09.00am – 10.00am | Apache Web Server   |  |
|                   | Installation & Configuration  |  |
|                   | Directory Structure   |  |
|                   | Basic Server Directives   |  |
| 10.00am – 10.30am | Breakfast   |  |
| 10.30am – 12.45pm | Setting up the Virtual Host   |  |
|                   | <ul> <li>Using aliases and redirecting</li> </ul>                             |  |
|                   | Dynamic Web Content   |  |
|                   | <ul> <li>Installing PHP &amp; MySQL</li> </ul>                                |  |
|                   | Demo : Ibstall Wordpress  |  |
| 12.45pm – 02.15pm | Lunch   |  |
| 02.15pm – 05.00pm | Web Server Hardening Strategies   |  |
|                   | Hide web server details   |  |
|                   | <ul> <li>Securing user and group accounts</li> </ul>                          |  |
|                   | <ul> <li>Securing files &amp; directories</li> </ul>                          |  |
|                   | PHP hardening   |  |
|                   | <ul> <li>MySQL database security</li> </ul>                                   |  |
| Day 2             |   |  |
| 09.00am – 10.00am | Implementing Apache Security Module   |  |
|                   | ModSecurity   |  |
|                   | Suhosin   |  |
| 10.00am – 10.30am | Breakfast   |  |
| 10.30am – 12.45pm | Implementing Website Encryption   |  |
|                   | Enabling HTTPS  |  |
|                   | Obtaining SSL certificates  |  |
|                   | <ul> <li>Installing SSL certificates</li> </ul>                               |  |
|                   | Requiring encrypted access  |  |
| 12.45pm – 02.15pm | Lunch   |  |
| 02.15pm – 05.00pm | Web Server Monitoring and Maintenance   |  |
|                   | Log monitoring  |  |
|                   | <ul> <li>Intrusion detection and prevention</li> </ul>                        |  |
|                   | Software updates  |  |
|                   |   |  |
|                   | <ul> <li>Website backups and restores</li> <li>Security monitoring</li> </ul> |  |
